1. Argentina

Status

- ▶ On 17 March 2021, the Province of Buenos Aires published Resolution 9/2021 (the Resolution) in the Official Gazette. It sets out the procedure that "substitute taxpayers" (i.e. Argentine residents acting as withholding agents) must follow for "turnover tax" withholding payments related to taxable activities undertaken by non-residents for tax periods beginning 1 January 2021 onwards.
- ▶ A Law has been enacted in two of Argentina's largest provinces, Buenos Aires City and Buenos Aires Province. As per the current rules, the tax entered into force on 1 January 2021 in both Province of Buenos Aires and Buenos Aires City, applying to payments beginning on such date. It should be mentioned that this tax has also been included in the local regulations of many other provincial jurisdictions with similar characteristics.
- ▶ Argentina's "turnover tax" is a gross receipt tax that is levied on a provincial basis on the gross revenues generated by businesses. There are 24 provincial jurisdictions throughout Argentina. While the turnover tax existed for many years, the jurisdictions are now extending the tax to foreign providers of digital services used in Argentina. This expansion represents a distinct addition to previously in- force rules.

City of Buenos Aires

- ▶ Digital services are understood to be those developed through the internet network or any adaptation or application of the protocols, platforms or technology used by the internet or another network through which equivalent services are provided which, by their nature, are basically automated, require minimal human intervention and require the use of devices for download, display or use.

Province of Buenos Aires

- ▶ Digital services will be considered, whatever the device used for downloading, viewing or use, those carried out through the internet network or any adaptation or application of the protocols, platforms or technology used by the internet or other network through which equivalent services are provided that, by their nature, are basically automated and require minimal human intervention, comprising, among others, the following:
 - a) The supply and hosting of computer sites and webpages, as well as any other service consisting of offering or facilitating the presence of companies or individuals in an electronic network
 - b) The supply of digitized products in general, including, but not limited to, computer programs, their modifications and updates, as well as access and/or download of digital books, designs, components, patterns and the like, reports, financial analysis or data and market guides
 - c) The remote maintenance, in an automated way, of programs and equipment
 - d) Remote system administration and online technical support
 - e) Web services, comprising, among others, the storage of data with remote or online access, memory services and online advertising
 - f) Software services, including, among others, software services provided on the internet ("software as a service" or "SaaS") through cloud-based downloads
 - g) Access and/or download to images, text, information, video, music, games. This section includes, among other services, the downloading of movies and other audiovisual content to devices connected to the internet, online downloading of games – including those with multiple players connected remotely – the dissemination of music, movies, bets or any other digital content – although it is done through streaming technology, without downloading to a storage device – obtaining jingles, mobile and music tones, viewing online news, traffic information and weather forecasts – even through satellite benefits – weblogs and website statistics
 - h) The provision of databases and any service generated automatically from a computer, through the internet or an electronic network, in response to a specific data entry by the customer
 - i) The services of online clubs or dating websites
 - j) The service provided by blogs, magazines or newspapers online
 - k) The provision of internet services

Scope

1. Argentina (contd.)

Scope	<p>l) Distance education or test or exercises, performed or corrected automatically</p> <p>m) The granting, for consideration, of the right to market a good or service on an internet site that functions as an online market, including online auction services</p> <p>n) The manipulation and calculation of data through the internet or other electronic networks</p>			
Rate	<p>The rate usually varies between 3% and 5%, but lower or higher rates may apply depending on the province and type of activity. In the two provinces listed, the tax is levied at a rate of 2%, slightly lower than the average rate for this tax, and viewed as a “special rate” on service providers not located in Argentina. The Province of Buenos Aires has issued regulations regarding the resident parties that should act as substitute taxpayers for nonresident providers of digital services.</p>			
Thresholds	<p>The Province of Buenos Aires’ regulations foresee thresholds related with the revenues generated by the non-resident service providers, the number of users domiciled in the province and the number of transactions with the referred users. Please note that the amounts of these parameters will vary from year to year. In any case, in practical terms the foreign service providers will be subject to the tax to the extent that they are included in the list of foreign service providers prepared by the corresponding provincial tax authorities.</p>			
Exclusions	<p>None specified</p>			
Effective date	<p>1 January 2021 in the Province of Buenos Aires and City of Buenos Aires. It is expected that other provinces will follow suit, extending their existing turnover taxes to foreign providers of digitally delivered services.</p>

3. Brazil

Status	<ul style="list-style-type: none">▶ The Brazil Senate is currently analyzing a tax reform proposal for indirect taxes that, after many years of discussion, passed the Chamber of Deputies on 7 July 2023.▶ The proposal provides for a major simplification of the Brazilian tax system, streamlining the five existing indirect taxes into just two main taxes (IBS 1, state and municipal, and CBS 2, federal) plus an excise tax and a possible state contribution applied upon primary and semi-finished products (still under discussion in the Senate).▶ In addition to significantly simplifying the current tax system, the proposal would generate a wide range of changes in markets and relative prices of products and could also impact digital services.

4. Canada

4.1. Canada - Federal Government

Status	<ul style="list-style-type: none">▶ Canada tabled the Digital Services Tax Act in the House of Commons on 30 November 2023. The proposed Act would implement the Digital Services Tax (DST) announced in the 2020 Fall Economic Statement▶ On 4 August 2023, Canada's Department of Finance published the revised legislative draft and Explanatory notes of the new Digital Services Tax Act (DST Act). The DST is a 3% tax on Canadian Digital Services Revenue (CDSR) derived from the provision of digital services related to (i) online marketplace, (ii) online advertising, and (iii) social media. Furthermore, the revenue derived from the sale of user data is also subject to the DST.▶ The DST will apply to resident and non-resident companies, both private and public, with: (i) consolidated revenue of at least EUR 750 million; and (ii) CDSR in excess of CAD 20 million. The Canadian digital revenue threshold is lowered to CAD 10 million for registration purposes.▶ The draft legislation states that the DST applies retrospectively from 1 January 2022.
Scope	The tax will apply to Canadian Digital Services Revenue.
Rate	3%
Thresholds	Businesses with consolidated revenue of at least EUR 750 million and CDSR in excess of CAD 20 million.
Exclusions	The draft provides caveats and excludes from the DST, for example, revenue derived from online marketplaces (i) with a single supplier or (ii) the main purpose of which is to provide payment services, make advances, grant credit or lend money, or facilitate the supply of financial instruments.
Effective date	It is anticipated that Canada's DST legislation will be enacted by 1 January 2024 with retrospective effects from 1 January 2022.
EY Global Tax Alerts	EY Tax Alert 2023 no 36 - Canada moving ahead with its own digital services tax: revised draft legislation released EY Canada

5. Denmark

Status	<ul style="list-style-type: none"> On 19 December 2023, the Danish parliament passed Bill No. L 70 introducing a cultural levy on on-demand audio-visual media service providers. The law applies from 1 January 2024.
Scope	<ul style="list-style-type: none"> The relevant revenues are limited to gross revenues from Denmark stemming from the provision of on-demand audio-visual media services. The law is applicable irrespective of which business model the service provider applies. For example, the law applies to business models such as subscription video on demand (SVOD), transactional video on demand (TVOD) and combinations thereof. Service providers that solely offer audio on-demand services fall outside of the scope of the law. The law only applies to service providers established in Denmark and service providers established in another EU Member State that service a target audience in Denmark. Among others things, services will be deemed to target an audience in Denmark if the services include advertising or other promotional measures that specifically target an audience in Denmark, the main language is Danish, or the content or commercial communication specifically targets an audience in Denmark. A service provider is deemed to be established in an EU Member State if its headquarters is in that Member State and editorial decisions are made in that Member State. If a service provider has its headquarters in a Member State, but editorial decisions are made in a third country, or vice versa, the service provider will be deemed to be established in the Member State if a substantial number of employees engaged in the audio-visual business work in that Member State.
Rate	<p>The base for the cultural levy will be the revenues generated in Denmark. A basic rate of 2% of the Danish revenues will apply to all on-demand streaming companies. A 3% surcharge will apply to companies that invest less than 5% of their Danish revenues in Danish content (i.e., the total rate will be 5%).</p>
Thresholds	<p>15 million Danish Krone</p>
Exclusions	<p>Revenues from sports and news channels, flow television channels, as well as pure distribution of other media service providers are excluded, provided that the distributor has no editorial responsibility.</p> <p>The scope of the law is also subject to the following carveouts:</p> <ul style="list-style-type: none"> The law is not applicable to service providers with an annual total turnover of less than 15 million Danish Krone (DKK15m) or with a small Danish audience (less than 1% of the total number of subscriptions on the Danish market). The turnover must include the turnover of partnering enterprises and associated enterprises. The law is not applicable to on-demand audio-visual streaming services that are offered in connection with the performance of public service activities under section 11 of the Danish law on radio and television activities or offered in connection with the regulations in the other EU Member State where the service provider is established.
Effective date	<p>The law applies from 1 January 2024, and the first payment of the cultural levy must be made in 2025 based on the turnover in 2024.</p>
Notes	<ul style="list-style-type: none"> The revenues from the new levy will be used to finance the production of Danish movies, fiction series and documentaries. According to the Danish government, the cultural levy observes the Audio-visual Media Services Directive (EU 2018/1808) and the Organisation for Economic Co-operation and Development (OECD) rules on taxation of the digital economy (base erosion and profit shifting (BEPS)).

6. European Union

Status

- ▶ On 14 January 2021, the European Commission (the Commission) published a roadmap including a public consultation for the introduction of a digital levy - an EU-wide tax on digital business activities, to contribute to the EU's own resources. On 12 July 2021 the EU put digital levy plans on hold to work on finalizing the tax decision endorsed by the G20.
- ▶ On 16 September 2020, European Commission President Ursula von der Leyen delivered the State of the Union address. She confirmed that an agreement that falls short of a fair tax system that provides long-term sustainable revenues, Europe will come forward with a proposal early next year. The letter of intent sent to the European Parliament and Germany as current EU presidency holder includes the legislative proposal for a digital levy.
- ▶ On 7 September 2020, it was reported that the European Commission plans to launch an EU digital tax from June 2021, and outlined its proposals to EU tax officials at the High-level Working Group on Taxation last week. The published EU Council agendas indicate that digital taxation is on the agenda for the December ECOFIN meeting of the EU finance ministers.
- ▶ On 21 July 2020, the European Council (the Council) agreed on a recovery plan and the EU budget for 2021 - 2027. The agreement reached by the leaders of the 27 Member States was reflected in the Council conclusions (the conclusions) published on the same day. The conclusions also include an agreement to introduce EU-wide taxes and levies to complement the existing own resources and to cover more than half of the Next Generation EU (NGEU). The proposed resources include a digital levy from 1 January 2023.
- ▶ On 1 July 2020, Germany assumed the rotating six-month Presidency of the Council of the European Union (EU) following the Croatian Presidency. Germany will hold the Presidency of the Council of the EU until 31 December 2020. On 30 June 2020, the Germany Presidency of the Council of the EU published its Programme. In the tax area, the program indicates the implementation of the OECD proposals on addressing the tax challenges arising from the digitalization of the economy in the EU.
- ▶ On 2 June 2020, the US Trade Representative (USTR) announced investigations will be conducted into certain jurisdictions relating to the adoption or contemplated adoption of a DST. As outlined in a corresponding Federal Register Notice (FRN) (comment due 15 July 2020), jurisdictions included within the scope of this announcement include: Austria, Brazil, the Czech Republic, the European Union (EU), India, Indonesia, Italy, Spain, Turkey and the UK.
- ▶ On 27 May 2020, the European Commission presented its proposal for a recovery plan from the crisis that societies and economies face due to COVID-19. To ensure the recovery is sustainable and fair for all EU Member States, the Commission proposed to create a new recovery instrument worth EUR750 billion, called "Next Generation EU." As part of the funding proposal for the instrument, the Commission proposed the introduction of EU taxes to complement the existing own resources. The proposal includes a digital tax applied on companies with a turnover above EUR750 million that could generate up to EUR1.3 billion per year for the EU budget. The analysis and assessment of the Commission's proposal will start immediately in the bodies of the EU institutions with the aim to reach a political agreement at the level of the European Council by July.
- ▶ In a document dated 1 March 2019 (6873/19, LIMITE, FISC 135, ECOFIN 242, DIGIT 44) the Council of the EU indicated that the initial scope should be limited to the taxation of revenues resulting from the provision of digital advertising services. Taxable revenues obtained by an entity in a tax period shall be treated as obtained in a Member State in that tax period if users with respect to the taxable service are located in that Member State in that tax period. A user shall be deemed to be located in a Member State in a tax period if the advertising in question appears on the user's device at a time when the device is being used in that Member State in that tax period to access a digital interface. Thresholds, rates (3%), etc., remain unchanged in this proposal.

6. European Union (contd.)

Status	<ul style="list-style-type: none"> ▶ In the first proposal, laid down in a document dated 21 March 2018, the Commission proposes a new Council Directive on the common system of a digital services tax on revenues resulting from the provision of certain digital services (COM (2018) 148 final, 2018/0073 (CNS)). The following revenues resulting from the provision of each of the following services are taxable under this proposal: <ul style="list-style-type: none"> ▶ The placing on a digital interface of advertising targeted at users of that interface ▶ The making available to users of a multi-sided digital interface that allows users to find other users and to interact with them, and which may also facilitate the provision of underlying supplies of goods or services directly between users ▶ The transmission of data collected about users and generated from users' activities on digital interfaces ▶ As a general rule, "taxable person" covered by the proposal are entities meeting both of the following conditions: <ul style="list-style-type: none"> ▶ The total amount of worldwide revenues reported by the entity for the relevant financial year exceeds EUR750 million ▶ The total amount of taxable revenues obtained by the entity within the Union during the relevant financial year exceeds EUR50 million ▶ Rules are proposed for determining whether and how revenue should be allocated to various jurisdictions, as well as the calculation of the tax. The rate is set at 3%.
Scope	<p>Revenues resulting from the provision of digital advertising services. Taxable revenues obtained by an entity in a tax period shall be treated as obtained in a Member State in that tax period if users with respect to the taxable service are located in that Member State in that tax period. A user shall be deemed to be located in a Member State in a tax period if the advertising in question appears on the user's device at a time when the device is being used in that Member State in that tax period to access a digital interface.</p>
Rate	<p>3%</p>
Thresholds	<p>EUR750 million (revenues reported worldwide) and EUR50 million (taxable revenues obtained within the EU)</p>
Exclusions	<p>Revenues resulting from the provision of a service by an entity belonging to a group to another entity in that same group shall not qualify as taxable revenues for the purposes of this Directive.</p>
Effective date	<ul style="list-style-type: none"> ▶ 1 January 2022 ▶ Digital Levy 1 January 2023
EY Global Tax Alerts	<ul style="list-style-type: none"> ▶ G20 Finance Ministers endorse key components of global tax changes and invite holdouts to back the agreement (11 July 2021) ▶ USTR releases findings of Section 301 investigation on DST regimes of Austria, Spain and the UK, and 301 findings on Vietnam's currency valuation practices EY - Global (21 January 2021) ▶ European Commission launches consultation on EU digital levy EY - Global (15 January 2021) ▶ USTR initiates investigations into digital services taxes either adopted, or under consideration, by certain jurisdictions (4 June 2020)

6. European Union European Union - Directive on Administrative cooperation in the field of taxation (DAC7)

Status	Unanimously voted on 22 March 2021 by Council of European Union
Scope	<ul style="list-style-type: none"> ▶ New rules adopted, introducing a reporting obligation for digital platforms located inside and outside of the EU. This will eventually lead to the aim of having within the EU an automatic exchange and collection of information between Member States' tax administrations on revenues generated by sellers on the digital platforms as of January 2023. The New rules for information from digital platforms are inspired by the OECD work in this area, but is much wider in terms of scope and businesses affected. ▶ The main difference, however, between the OECD framework and the DAC7, is the inclusion of the "sale of goods" in DAC7. Currently the OECD does not have the sale of goods within its scope under its released Model Rules for "reporting by platform operators with respect to Sellers in the Sharing and Gig Economy" (approved on the 29 June 2020). The aforementioned rules lay out a system requiring digital platforms to collect information on income realized by sellers offering accommodation, transport, and personal services through their digital platforms. The EU, however, through its aim toward a harmonization framework across the Member States for reporting of digital platform operators, sets guidelines in order to provide Member States with the full set of information on the sellers; ultimately, the EU strives to increase legal certainty, clarity and fairness across its Member States when taxing digital platforms. ▶ It is important to note, that the impact of the proposal is global, with the reporting obligations not limited to platforms in the EU or concerning immovable property in the EU. Digital platform operators are advised to timely establish due diligence and information collection processes. Furthermore, the affected companies should assess what changes to their processes and technology enabling them to correctly report the type contemplated in the revised DAC7.
Rate	N/A
Thresholds	N/A
Exclusions	Crowdfunding activities have been removed from the scope of the proposal. Moreover, non-EU platforms would be relieved from reporting to EU tax administrations where such companies have adequate arrangements within the selling Member State, ensuring that equivalent information is exchanged between a non-EU state and a Member State.
Effective date	No later than the 31 January 2024
EY Global Tax Alerts	<ul style="list-style-type: none"> ▶ EU adopts tax transparency rules for digital platforms (DAC7) (ey.com) ▶ See EY Global Tax Alert, OECD releases model rules for data reporting by platform operators for sellers in the sharing economy, dated 8 July 2020. ▶ See EY Global Tax Alert, European Commission opens public consultation into collection and exchange of taxpayer information from digital platform providers, dated 17 February 2020. See EY Global Tax Alert, European Commission adopts package for fair and simple taxation, dated 16 July 2020.

7. France

Status

- ▶ On 15 February 2023, a joint statement was issued between the United States and Austria, France, Spain, Italy and the United Kingdom, which agreed to extend the suspension of digital services taxes until 30 June 2024 (when it is hoped that the Pillar One MLC will be signed).
- ▶ On 12 March 2024, the US also agreed with Turkey to suspend its digital services tax until the same date. The US Treasury Department published a new joint statement announcing the extension of the compromise agreement to include Turkey.
- ▶ On 18 December 2023, the G20/OECD Inclusive Framework on Base Erosion and Profit Shifting (the "Inclusive Framework") issued a statement calling for a finalization of the text of the Pillar One multilateral convention (MLC) by the end of March 2024 with a view to holding a signing ceremony by the end of June 2024.
- ▶ On 21 June 2023, the French tax authorities issued a new revised Guidance on French DST. The Guidance has been modified in 2022 pursuant a March-decision of the French Supreme Court that canceled part of the Guidance in force at that time. Since the Supreme court ruled that the interpretation provided in the Guidance was going beyond the law, the lawmaker changed it in late 2022 in order to restate some positions of the previous Guidance and also to clarify certain concepts or references.
- ▶ On 21 October 2021, a Joint Statement from Austria, France, Italy, Spain, the UK and the US was released describing a compromise reached by the countries on a transitional approach to the treatment of existing digital services taxes (DSTs) and other relevant similar measures during the interim period before new OECD Pillar One rules come into effect.
- ▶ Under the compromise, the five European countries, which are not required to withdraw their existing DST regimes until Pillar One takes effect, have agreed to allow a portion of taxes accrued by a multinational enterprise (MNE) under their DSTs or any other unilateral measures before Pillar One takes effect to be credited against the MNE's future Pillar One Amount A tax liability when Pillar One rules are in effect. The US has agreed to terminate its proposed trade actions against the five countries with respect to their existing DSTs and commits not to impose further trade actions with respect to such countries and their DSTs during this interim period. Finally, the six countries are to remain in close contact to ensure there is a common understanding of the agreement and to endeavor to resolve any differences of view.

Scope

Imposition of the DST in France requires four cumulative conditions:

- ▶ Existence of a taxable service
 - ▶ 2 categories of in-scope services, divided into two sub-categories:
 - ▶ Digital intermediation services
 - ▶ Marketplaces
 - ▶ Networking
 - ▶ Target online advertising services
 - ▶ Targeting services
 - ▶ Sale of data for the purpose of online targeted advertising
- ▶ Location of the taxable service in France
- ▶ Receipt of income in return for the taxable service
- ▶ Satisfaction of the revenue thresholds for application of the DST, determined on the basis of all entities that are directly or indirectly affiliated based on control

7. France (contd.)

Rate	3% (on revenues in-scope of the DST)
Thresholds	Gross amounts received from worldwide taxable services (as defined by the French DST law) more than EUR750m and gross amounts received from deemed French taxable services (as defined by the French DST law i.e., based on the computation of the so-called French presence ratio which is different for each sub-category of in-scope services) more than EUR25m
Exclusions	Certain regulated financial services; provision of a digital interface by which a person or entity uses it as a single or main basis for providing users with digital content, communication services, payment services, services exclusively provided intragroup, direct sale of goods or services online, and nontargeted advertising
Effective date	1 January 2019
Notes	<p>Possibility to set a DST consolidated group, where all DST taxpayers entities appoint a single entity to file and pay DST on their behalf. Based on the law, the amount to be paid is equal, for each taxpayer and for each taxable service, to the product of the following three terms:</p> <ul style="list-style-type: none"> ▶ The total amounts collected worldwide, in consideration for the provision of the taxable service, referred to as "taxable amounts"; ▶ A representative percentage of the portion of the service related to France, known as the "French presence ratio"; ▶ The rate of 3%,
EY Global Tax Alerts	<ul style="list-style-type: none"> ▶ Six country Joint Statement on transitional approach to existing unilateral measures during period before Pillar One is in effect (25 October 2021) France issues comprehensive draft guidance on digital services tax (13 April 2020) ▶ French tax authorities confirm postponement of Digital Services Tax payments for 2020, but 2019 payments remain due (11 February 2020) ▶ G7 leader's declaration addresses international tax, France discusses future of French Digital Services Tax (28 August 2019) ▶ French President signs bill on Digital Services Tax and partial freeze of corporate income tax rate decrease (25 July 2019) ▶ French Parliament approves draft bill on partial freeze of corporate income tax rate decrease (16 July 2019) ▶ US initiates action against France's Digital Services Tax, issues additional exclusions on China-origin goods and supplements list of products under EU subsidies dispute (12 July 2019) ▶ France's Parliamentary Commission agrees on Digital Services Tax (3 July 2019) ▶ French government submits draft bill on digital services tax to Council of Ministers (8 March 2019)

8. India

Status	<ul style="list-style-type: none">▶ The definition of Online Information and Database Access and Retrieval (OIDAR) services under the Integrated Goods and Services Tax (IGST) Act has been amended by the Finance Act, 2023.▶ This amendment shall be effective from 1 October 2023.▶ New provisions have been inserted under IGST Act, for services of Online Money Gaming supplied by a person located outside the taxable territory of India to a person located in India.▶ Amendment further provides for mandatory single GST registration through simplified registration scheme of a person supplying online money gaming from a place outside India to a place in India.▶ The rate of GST with respect to such supply shall be 28 percent of the amount deposited by the participant.▶ These amendments are proposed to be effective from 1 October 2023.
Scope	<ul style="list-style-type: none">▶ The term OIDAR services was earlier defined to mean services whose delivery was mediated by information technology over the internet or an electronic network and the nature of which renders their supply essentially automated and involving minimal human intervention and impossible to ensure in the absence of information technology and includes electronics services such as advertising on the internet, cloud services, e-books etc. through telecommunication networks or internet, online supplies of digital content, digital data storage and online gaming.▶ This definition has been amended through deletion of words “essentially automated and involving minimal human intervention”. This was because it created ambiguity in interpretation and gave rise to subjectivity. Also, the “Online Money Gaming” has been excluded from the definition of OIDAR services.▶ For OIDAR services provided by a person located in a non-taxable territory to an unregistered recipient in India (business-to-consumer [B2C]), the tax is payable by such non-resident supplier by registering for GST in India, regardless of the turnover. For business-to-business (B2B) supplies of such services, tax is payable by the GST registered recipient, under reverse-charge mechanism.▶ The rate of GST with respect to such supply shall be 18 percent.▶ Online gaming means offering of a game on the internet or an electronic network and includes online money gaming.▶ Online money gaming means online gaming in which players pay or deposit money or money's worth, including virtual digital assets, in the expectation of winning money or money's worth, including virtual digital assets, in any event including game, scheme, competition or any other activity or process, whether or not its outcome or performance is based on skill, chance or both and whether the same is permissible or otherwise under any other law for the time being in force.<ul style="list-style-type: none">▶ Online money gaming has been treated as specified actionable claim and subjected to GST.▶ Any failure to comply with the requirement of compliance provisions would result in blocking of public access to information in any computer resource used for supply by such person.

9. Indonesia

<p>Status</p>	<ul style="list-style-type: none"> ▶ On 2 June 2020, the US Trade Representative (USTR) announced investigations will be conducted into certain jurisdictions relating to the adoption or contemplated adoption of a DST. As outlined in a corresponding Federal Register Notice (FRN) (comment due 15 July 2020), jurisdictions included within the scope of this announcement include: Austria, Brazil, the Czech Republic, the European Union (EU), India, Indonesia, Italy, Spain, Turkey and the UK. ▶ In a fast-moving development as part of the country's COVID-19 stimulus efforts, the President of Indonesia released a "government regulation in Lieu of Law" that provides for new taxes on digital transactions. This was subsequently ratified as law. Notably, while the regulation is in immediate effect, implementing regulations are required before each taxing measure can take effect, to set key thresholds needed to enable impacted taxpayers to comply. Specifically, the new rules provide (i) an offshore VAT regime; and (ii) digital PE thresholds, and certain electronic transaction taxes (ETT). ▶ The offshore VAT regime has been implemented from 1 July 2020, with the Indonesian authorities provided the power to register certain offshore parties who conducts Trading Through Electronic ▶ System/e-commerce trade (Perdagangan Melalui Sistem Elektronik - "PMSE") to collect and to remit 11% Indonesian VAT on their digital transactions with the Indonesian customers. ▶ On 25 June 2020, the Directorate General of Taxes ("DGT") issued an implementing regulation which governs detailed criteria for certain offshore parties to be appointed as a Value Added Tax (VAT) collector, to collect, to pay as well as to report the VAT, at 11% on the utilization of intangible taxable goods and/or taxable services from outside the Indonesian Customs Area ("ICA") within the ICA on the trading done through electronic system/e-commerce trade, among others: <ul style="list-style-type: none"> ▶ The value of the transaction with the Buyer in Indonesia exceeds Rp 600 million in one) year or Rp. 50 million in one month; and/or b. number of traffic or accessor in Indonesia exceeds 12 thousand in one year or 1 thousand in one month. ▶ The appointed VAT collector is given a Tax Identification Number and must pay the VAT collected for every tax period by the end of the following month after the tax period ends, in IDR, USD or other currencies determined by the DGT. The VAT collector must submit reports on a quarterly basis that is due by the end of the following month after the quarter. The quarterly periods are January to March, April to June, July to September, October to December. ▶ This regulation is effective on 1 July 2020 and there are some certain offshore parties that have been appointed as VAT collectors, requiring those parties to implement the new rules starting from August 2020 transactions, and make the first VAT payment by the end of September 2020. ▶ On the Corporate Income Tax side, the primary approach is to define a new concept of permanent establishment and subject to in-scope foreign entities to corporate income tax. If the PE definition under a treaty overrides this domestic law, an electronic transaction tax (ETT) is imposed to tax income sourced from Indonesia. Implementing regulations in respect of the types of transactions, thresholds, rate of ETT and other administrative arrangements have not been issued yet.
<p>Scope</p>	<p>Foreign service providers who sell intangible goods or services to Indonesian customers through electronic system/e-commerce and are appointed as VAT Collectors for Indonesian VAT purposes are obliged to collect 11% VAT, to remit the VAT to the State Treasury and to report the VAT to the relevant tax office. Up to 31 July 2023, 158 such VAT Collectors have been appointed.</p>
<p>Rate</p>	<p>11%</p>
<p>Thresholds</p>	<p>For VAT purposes, the value of the transaction with the Buyers in Indonesia exceeds Rp. 600,000,000.00 (six hundred million rupiah) in 1 (one) year or Rp. 50,000,000.00 (fifty million rupiah) in 1 (one) month; and/or the amount of traffic or access in Indonesia exceeds 12,000 (twelve thousand) in 1 (one) year or 1,000 (one thousand) in 1 (one) month.</p>

9. Indonesia (contd.)

10. Italy

Status

- ▶ On 15 February 2023, a joint statement was issued between the United States and Austria, France, Spain, Italy and the United Kingdom, which agreed to extend the suspension of digital services taxes until 30 June 2024 (when it is hoped that the Pillar One MLC will be signed).
- ▶ On 12 March 2024, the US also agreed with Turkey to suspend its digital services tax until the same date. The US Treasury Department published a new joint statement announcing the extension of the compromise agreement to include Turkey.
- ▶ On 18 December 2023, the G20/OECD Inclusive Framework on Base Erosion and Profit Shifting (the “Inclusive Framework”) issued a statement calling for a finalization of the text of the Pillar One multilateral convention (MLC) by the end of March 2024 with a view to holding a signing ceremony by the end of June 2024.
- ▶ On 21 October 2021, a Joint Statement from Austria, France, Italy, Spain, the UK and the US was released describing a compromise reached by the countries on a transitional approach to the treatment of existing digital services taxes (DSTs) and other relevant similar measures during the interim period before new OECD Pillar One rules come into effect.
- ▶ Under the compromise, the five European countries, which are not required to withdraw their existing DST regimes until Pillar One takes effect, have agreed to allow a portion of taxes accrued by a multinational enterprise (MNE) under their DSTs or any other unilateral measures before Pillar One takes effect to be credited against the MNE’s future Pillar One Amount A tax liability when Pillar One rules are in effect. The US has agreed to terminate its proposed trade actions against the five countries with respect to their existing DSTs and commits not to impose further trade actions with respect to such countries and their DSTs during this interim period. Finally, the six countries are to remain in close contact to ensure there is a common understanding of the agreement and to endeavor to resolve any differences of view.
- ▶ On 2 June 2020, the US Trade Representative (USTR) announced investigations will be conducted into certain jurisdictions relating to the adoption or contemplated adoption of a DST. As outlined in a corresponding Federal Register Notice (FRN) (comment due 15 July 2020), jurisdictions included within the scope of this announcement include: Austria, Brazil, the Czech Republic, the European Union (EU), India, Indonesia, Italy, Spain, Turkey and the UK. These investigations were concluded in January 2021 when the USTR concluded that each of the DST regimes discriminates against US companies, is inconsistent with prevailing principles of international taxation and burdens or restricts US commerce. On 2 June 2021, the US Trade Representative announced the imposition of 25% punitive tariffs on goods from Austria, India, Italy, Spain, Turkey, and the UK in response to the countries’ Digital Services Tax (DST) regimes.¹ In the same announcement, the USTR suspended the imposition of tariffs for 180 days, with collection of the duties not beginning until 29 November 2021 in an effort to provide additional time for the ongoing multilateral negotiations among the nations regarding international taxation at the OECD
- ▶ In 2021 the Italian Tax Authority published some measures to implement the application of the Italian DST provisions and some official guidance and clarifications to comment the Italian DST provisions.
- ▶ The law was enacted with effect from 1 January 2020.
- ▶ The Italian Budget Law 2020 (Law no.160/2019) provided for the entry into force – as of 1 January 2020 – of a “new” DST replacing the “web tax” introduced by the Italian Budget Law 2019 (Law no.145/2018). No implementing Decree is required for the entry into force of the DST (as was previously the case for the “web tax”); the Italian Tax Authority:
 - ▶ Issued the implementing decree on 15 January 2021 that provided also instructions on payment and filing of annual return for FY 2020
 - ▶ Published the DST annual return on January 25, 2021
 - ▶ Issued a detailed circular letter on March 23, 2021

Scope

13. New Zealand

<p>Status</p>	<ul style="list-style-type: none"> ▶ The New Zealand government has reinstated the lapsed Digital Services Tax Bill, which proposes to implement a flat 3% digital services tax, if insufficient progress is made toward implementation of Pillar One of the BEPS 2.0 project. The proposed application date (1 January 2025) could be deferred by up to five years. The DST Bill does not represent a definitive commitment to impose a DST. Instead, it is intended to serve as a backstop and provide the government with legislative flexibility if an acceptable multilateral solution cannot be implemented within a reasonable timeframe. The timeframe for enactment of the DST Bill at this stage is therefore unclear. ▶ On 31 August 2023, the New Zealand government introduced a Digital Services Tax (DST) Bill, with the earliest possible implementation of a DST in New Zealand being 1 January 2025. The Bill allows the government to defer the start date by up to five years to 1 January 2030. The design of the DST includes elements of previous consultation undertaken in 2019.
<p>Scope</p>	<ul style="list-style-type: none"> ▶ Applies to in-scope “taxable digital services” - principally the provision of intermediation platforms, social media and content sharing platforms, and internet search engines. ▶ Additional in-scope activities include: <ul style="list-style-type: none"> ▶ Advertising on, linked to, connected with or facilitated by a relevant platform or search engine. ▶ Activities in relation to user-generated data, gathered in connection with a relevant platform, search engine or advertising described above. ▶ Incidental activities in relation to a relevant platform, search engine or advertising described above.
<p>Rate</p>	<p>3% on the group’s gross “taxable digital services” revenue attributable to New Zealand users or New Zealand land.</p>
<p>Thresholds</p>	<p>The DST will apply to a digital services group if both of these conditions are met:TTx for DPSPs: no threshold</p> <ul style="list-style-type: none"> ▶ The group’s global annual gross “taxable digital services” revenue is at least EUR750m. ▶ Annual gross “taxable digital services” revenue attributable to New Zealand users or New Zealand land exceeds NZD3.5m.
<p>Exclusions</p>	<p>Digital activities or services that do not generate significant value from active user participation are generally excluded from the DST. For example:</p> <ul style="list-style-type: none"> ▶ Taxable digital services that are merely incidental to a supply of goods or services that is not a taxable digital service ▶ Regulated or supervised online financial marketplace activities ▶ Loyalty programme online platforms ▶ While not specifically excluded, e-commerce and the provision of online content (such as tv, film and music streaming services, online tv and radio broadcasting, and the supply of digital news articles and video game subscription services) are intended to be outside the scope of the DST
<p>Effective date</p>	<p>Earliest implementation by 1 January 2025, with legislative flexibility to defer the start date by up to five years to 1 January 2030. The ability to defer the commencement date gives the government time to monitor implementation of Pillar One of the OECD’s Two-Pillar multilateral solution and decide whether the DST Bill is necessary. If the DST is imposed, the intention is that it will be repealed if an acceptable multilateral solution is implemented.</p>

13. New Zealand (contd.)

Notes	<ul style="list-style-type: none">▶ If implemented, the government estimates that the DST will raise NZ\$222m over a four-year period.▶ The DST Bill has adopted the concept of a “New Zealand user” as opposed to tax residency. A “New Zealand user” is defined to include any user of the digital services normally located in New Zealand, which could be determined by various factors including billing and internet protocol (IP) addresses, telephone area codes, bank details, and geolocation information.			
EY Global Tax Alerts	<ul style="list-style-type: none">▶ New Zealand government reinstates Digital Services Tax Bill, following General Election EY - Global (8 December 2023)▶ New Zealand introduces draft Digital Services Tax legislation (7 September 2023)▶ New Zealand government to “seriously consider” a Digital Services Tax (5 June 2019)▶ New Zealand announces proposal to implement Digital Services Tax (26 February 2019)▶ New Zealand Tax Working Group considers future of tax in New Zealand (9 October 2018)

15. Spain

Status

- ▶ On 15 February 2023, a joint statement was issued between the United States and Austria, France, Spain, Italy and the United Kingdom, which agreed to extend the suspension of digital services taxes until 30 June 2024 (when it is hoped that the Pillar One MLC will be signed).
- ▶ On 12 March 2024, the US also agreed with Turkey to suspend its digital services tax until the same date. The US Treasury Department published a new joint statement announcing the extension of the compromise agreement to include Turkey.
- ▶ On 18 December 2023, the G20/OECD Inclusive Framework on Base Erosion and Profit Shifting (the "Inclusive Framework") issued a statement calling for a finalization of the text of the Pillar One multilateral convention (MLC) by the end of March 2024 with a view to holding a signing ceremony by the end of June 2024.
- ▶ On 16 October 2020, the Spanish law (the Law) on DST was published in the Spanish Official Gazette after its prior approval by the Spanish Congress and Senate
- ▶ On 14 January 2021, the US Trade Representative (USTR) published the results of the investigations of the Spanish DST, concluding that the features of Spanish DST are unreasonable, discriminatory and burdensome. Nonetheless, no retaliatory measures were imposed.
- ▶ During the Q1 of 2021, the Spanish Tax Authorities ("STA") started to require information to companies potentially subject to the Spanish DST, regarding income received and payments made in FY20 for services that could be included in any of the 3 categories of online services regulated as taxable events of DST (i.e. online advertising services, online intermediation services, data transfer services).
- ▶ On 31 May 2021, the Basque Tax Authorities approved their own DST regulations. Because of constitutional rights, the three provinces included in this region have the right to regulate their own taxes so they approved their own DST regulation as well as their corresponding DST forms to be filled in each of the territories. These regulations have been applicable from 2Q 2022 onwards (this is, for filing obligations with a deadline after 1 July 2022). Additionally, on 20 October 2022, Navarra, another region with constitutional rights to approve its own tax regulation, also approved the DST regulations applicable in its territory. The DST regulations approved by each of the referred regions do not change the main aspects of the DST regulation of the Spanish central territory but instead of submitting only one tax form, companies need to submit five different tax forms, one for each of the three Basque provinces, another one for Navarra and the last one for the rest of Spain. In this regard, companies must declare in each tax form the revenues concerning to the users of the digital services that are located in each of the referred territories or in the rest of the Spanish territory.
- ▶ On 9 June 2021, Royal Decree 400/2021, whereby allocation of users' devices and formal obligations with regards to the Digital Services Tax (DST) is developed has been published in the Spanish Official Gazette. The regulation develops two aspects of the tax: (i) the mechanisms for locating users' devices and (ii) the formal (ii) the formal obligations (the keeping of registers, the preparation of a descriptive report and the and the establishment of systems, mechanisms or agreements for the location of the users).
- ▶ On 10 June 2021, the Ministry of Finance published the draft interpretative Resolution of the General Directorate of Taxes regarding the DST. A text widely demanded by the business sector, which aims to establish interpretative and clarifying criteria for the application of the DST. This draft has been subject to a public information and audience process until 21 June 2021.
- ▶ On 11 June 2021, Order HAC/590/2021 was published, approving the tax form 490 and determining the form and procedure for its submission. This Order confirms the deadlines for the filing of tax returns of the first and second quarter returns, which must be filed and paid between 1 July to 2 August 2021.
- ▶ On 21 October 2021, a Joint Statement from Austria, France, Italy, Spain, the UK and the US was released describing a compromise reached by the countries on a transitional approach to the treatment of existing digital services taxes (DSTs) and other relevant similar measures during the interim period before new OECD Pillar One rules come into effect.
- ▶ Under the compromise, the five European countries, which are not required to withdraw their existing DST regimes until Pillar One takes effect, have agreed to allow a portion of taxes accrued by a multinational enterprise (MNE) under their DSTs or any other unilateral measures before Pillar One takes effect to be credited against the MNE's future Pillar One Amount A tax liability when Pillar One rules are in effect. The US has agreed to terminate its proposed trade actions against the five countries with respect to their existing DSTs and commits not to impose further trade actions with respect to such countries and their DSTs during this interim period. Finally, the six countries are to remain in close contact to ensure there is a common understanding of the agreement and to endeavor to resolve any differences of view.
- ▶ During FY22 the STA have started to carry out some tax audits to Companies which have been registered in Spain for DST purposes.

15. Spain (contd.)

Scope	<p>DST is imposed on the provision of the following digital services:</p> <ul style="list-style-type: none"> ▶ The placing on a digital interface of advertising targeted at users of that interface (online advertising services) ▶ Services consisting in making available multi-sided digital interfaces to users that allow them to find other users and to interact with, and which may also facilitate the provision of underlying supplies of goods or services directly among users (online intermediation services) ▶ The transmission of data collected about users that has been generated from such users' activities on digital interfaces (data transfer services) 		
Rate	3% of gross revenues from Spanish in-scope activities above threshold		
Thresholds	Worldwide revenues of EUR750 million per annum, with a total amount of taxable revenues obtained in Spain exceeding EUR3 million per annum		
Exclusions	In addition to the relevant EU compromise text exclusions; intragroup transactions when there is a direct or indirect participation of 100%, regulated financial services rendered by regulated financial entities, and income derived from the transfer of data by regulated financial entities		
Effective date	Three months following the publication of the Law in the Spanish Official Gazette, i.e., as of 16 January 2021.

16. Tanzania

Status

- ▶ Digital Service Tax (DST) is charged on gross payments made to a non-resident person who provides electronic services to a resident individual other than in conducting business.
- ▶ “gross payment” means a total amount of payment, excluding value added tax, derived by a non-resident person from an individual, other than a payment made in the course of conducting a business, in respect of electronic services.
- ▶ Electronic services are defined to mean any of the following services provided or delivered through a telecommunications network: websites, web-hosting, or remote maintenance of programs and equipment; software and the updating thereof; Images, text, and information; access to databases; self-education packages; music, films, and games, including gaming activities; political, cultural, artistic, sporting, scientific, and other broadcasts and events including broadcast television; as well as online intermediation and online advertisement services.
- ▶ Income tax is imposed on non-resident persons who receive payments in respect of electronic services that have a source in Tanzania from individuals, other than payments made in the course of conducting business. The tax is charged at 2% of gross payment.
- ▶ A non-resident provider of electronic services shall be required to make an online application for registration to the Commissioner General.
- ▶ Returns for tax on electronic services shall be filed by the 20th Day of the month following the month to which the payments relate.

Scope

- ▶ DST requirements are applicable on non-commercial related payments that have a source in Tanzania, made by individuals to non-resident persons as a consideration for electronic services
- ▶ The non-resident person who provides electronic services shall be required to make registration via the e-filing portal.
- ▶ The non-resident person is required to file a return accompanied with the tax payable in respect of electronic services rendered in the tax period. The return is due for filing on or before the twentieth day after the end of the month to which the payment relates.
- ▶ The tax payable shall be deposited to a bank account designated by the Commissioner General in Tanzanian shilling or its equivalent convertible currency at the Bank of Tanzania’s prevailing exchange rate on the date of payment.
- ▶ According to the Income Tax (Registration of Non-Resident Electronic Service Suppliers) Regulations 2022, electronic services provided or delivered through the Internet or any other electronic means include:
 - ▶ Websites, web-hosting or remote programs and equipment: (i) search engines and automated helpdesk services; (ii) customizable search engine services; and (iii) downloadable digital content including downloadable mobile applications, e-books and films;
 - ▶ Software and updating thereof: (i) application software; (ii) system software; (iii) drivers; (iv) filters and firewalls; and (v) plugins;
 - ▶ Images, texts or information: (i) desktop themes; (ii) photographic images; (iii) pictorial images; (iv) screensavers; and (v) any right to view any item listed under this paragraph above;
 - ▶ Access to data: (i) subscription media (i.e. news, magazines, journals, periodicals and publications, blogs, databases, information system services, games, Internet-based auction services, social networking services, webcasts, webinars, websites, web applications); (ii) electronic data management (i.e. online data warehousing, file sharing and cloud storage services); (iii) sharing and gig economic services including transport hailing services or platforms; and (iv) electronic booking or electronic ticketing services;
 - ▶ Self-education packages: (i) distance teaching programs; (ii) educational webcasts; (iii) Internet-based courses; (iv) Internet-based education programs; (v) webinars; and (vi) digitized content of any book or electronic publication;
 - ▶ Music, film and games including gaming activities: (i) audio clips; (ii) broadcasts not simultaneously broadcast over any conventional radio network; (iii) jingles; (iv) live streaming performances; (v) ringtones; (vi) songs; (vii) broadcasts not simultaneously broadcast over any conventional television network in mainland Tanzania; (viii) documentaries; (ix) home-made videos; (x) streaming services; (xi) movies; (xii) music videos; (xiii) program; (xiv) television series; (xv) video clips; (xvi) sound effects; and (xvii) games and games of chance; and

18. Turkey

Status

- ▶ On 15 February 2023, a joint statement was issued between the United States and Austria, France, Spain, Italy and the United Kingdom, which agreed to extend the suspension of digital services taxes until 30 June 2024 (when it is hoped that the Pillar One MLC will be signed).
- ▶ On 12 March 2024, the US also agreed with Turkey to suspend its digital services tax until the same date. The US Treasury Department published a new joint statement announcing the extension of the compromise agreement to include Turkey.
- ▶ On 18 December 2023, the G20/OECD Inclusive Framework on Base Erosion and Profit Shifting (the “Inclusive Framework”) issued a statement calling for a finalization of the text of the Pillar One multilateral convention (MLC) by the end of March 2024 with a view to holding a signing ceremony by the end of June 2024.
- ▶ On 12 September 2023, Turkish Constitutional Court’s decision annulling paragraph 2 of article 7 of the Digital Services Tax Law No. 7419 (DST Law) was published in the Turkish Official Gazette. The rule which allows to block access to the services offered by digital service providers who do not fulfil their tax-related obligations, was annulled by the Turkish Constitutional Court on the grounds that such rule is against the Turkish Constitution. In its decision, Turkish Constitutional Court stated that the rule that allows to block access to digital services limits the freedom of enterprise of digital service providers and concluded that the limitation imposed with the rule is disproportionate and violated the principle of proportionality. The annulment decision will enter into force nine months after its publication in the Official Gazette (12 September 2023).
- ▶ As per the DST Law, the Turkish tax authority requests independent certification reports from digital service providers who exceed the local threshold (20 million Turkish Liras) but claim to be exempt from the DST due to fact that they do not exceed the global revenue threshold of EURO750m.
- ▶ On 22 November 2021, the US reached a political agreement with Turkey regarding the treatment of DSTs during the interim period prior to full implementation of the OECD’s Pillar One agreement. Under this agreement, and consistent with an earlier agreement concluded between the US, Austria, France, Italy, Spain, and the UK, Turkey will remove its existing DST prior to the entry into force of Pillar One and DST liabilities that companies accrue during the interim period will be creditable against future income taxes accrued under Pillar One. In return, the US will terminate the currently suspended additional duties on goods from Turkey that had been adopted in the DST Section 301 investigation.
- ▶ On 2 June 2020, the US Trade Representative (USTR) announced investigations will be conducted into certain jurisdictions relating to the adoption or contemplated adoption of a DST. As outlined in a corresponding Federal Register Notice (FRN) (comment due 15 July 2020), jurisdictions included within the scope of this announcement include: Austria, Brazil, the Czech Republic, the European Union (EU), India, Indonesia, Italy, Spain, Turkey and the UK. These investigations were concluded in January 2021 when the USTR concluded that each of the DST regimes discriminates against US companies, is inconsistent with prevailing principles of international taxation and burdens or restricts US commerce. On 2 June 2021, the US Trade Representative announced the imposition of 25% punitive tariffs on goods from Austria, India, Italy, Spain, Turkey, and the UK in response to the countries’ Digital Services Tax (DST) regimes.¹ In the same announcement, the USTR suspended the imposition of tariffs for 180 days, with collection of the duties not beginning until 29 November 2021 in an effort to provide additional time for the ongoing multilateral negotiations among the nations regarding international taxation at the OECD
- ▶ A DST has been levied for the first time in Turkey. DST return filings and payments for the first taxation period (March 2020) have been made by taxpayers’ subject to the DST who exceed the thresholds in 2019 accounting period. Filings and payments were made through the following link: digitalservice.gib.gov.tr by the last day of April.
- ▶ On 20 March 2020, General Communiqué on the Implementation of the Digital Services Tax (“DST Communiqué”) was published in the Official Gazette, effective from 1 March 2020.
- ▶ On 5 February 2020, the Turkish government published the Draft DST Communiqué. Draft DST Communiqué was updated on 28 February 2020 and republished on the website of the Turkish Revenue Administration. Draft DST Communiqué clarifies how the scope of DST would apply by providing several examples and explanations. As revised, storage of digital data on online platforms, tickets sold in the digital environment that provides the right to use services to an actual presentation (e.g., cinema, transport, concerts) and software activation that is required for a sold product to operate (and is incorporated within the product) are now out of scope of the DST. Some companies that provide a digital environment with which users can interact are also in scope. Companies that mediate the sale of various culture, art, sports and transport, as well as companies that provide a platform for people to share professional careers and professional interests are now in scope of the DST.

18. Turkey (contd.)

Status	<ul style="list-style-type: none"> ▶ On 5 December 2019, the Turkish Parliament enacted Law no.7194, which provides for a DST. This law was published in the Official Gazette on 7 December 2019 and the DST will enter into force as of 1 March 2020. ▶ On 24 October 2019, the Turkish government submitted an initial bill that would introduce a DST into Turkish tax legislation. The bill proposes a DST at a rate of 7.5% on gross revenues and sets forth the scope of the tax, the taxpayers and exemptions.
Scope	<ul style="list-style-type: none"> ▶ Services in scope are as follows: <ul style="list-style-type: none"> ▶ All types of advertisement services provided through digital platforms (including advertisement control and performance measurement services, as well as data transmission and management services concerning users, and technical services for providing advertisements) ▶ The sale of all types of auditory, visual or digital contents on digital platforms (including computer programs, applications, music, videos, games, in-game applications, etc.) and services provided on digital platforms for listening, watching, playing of this content or downloading of the content to the electronic devices or using of the content in these electronic devices ▶ Services related to the provision and operation services of digital platforms where users can interact with each other (including services relating to the sale or facilitation of the sale of goods or services among users) ▶ Intermediary services of digital service providers on digital platforms are subject to DST, as well. ▶ If a digital service provider fails to comply with provisions of the tax, there would be irregularity fines. However, there is a specific sanction for failure to comply with the registration. In this case of noncompliance, the Ministry of Treasury and Finance with cooperation may block access to the services provided by these service providers until the obligations are fulfilled. The blockage of access will be executed by the Information and Communication Technologies Authority in Turkey upon the notification from the Ministry of Treasury and Finance.
Rate	7.5% on gross revenues. The President retains the authority to reduce the rate to 1% or double it from 7.5% in relation to specific services.
Thresholds	EUR750 million in global revenues and TRY20 million (approximately USD744 thousand in 2023) in local revenues
Exclusions	<ul style="list-style-type: none"> ▶ Services that are subject to “treasury duty” paid in accordance with the Telegram and Telephone Law ▶ Services that are subject to the “special communication tax” ▶ Services within the scope of Article 4 of the Banking Law no.5411 ▶ Payment services within the scope of Article 12 of the Law on Payment and Securities Settlement Systems, Payment Services and Electronic Money Institutions ▶ Sales of products and services provided exclusively through these products developed because of research and development (R&D) activities in R&D centers that are defined under Article 2 of the Law on Supporting Research, Development and Design Activities dated 28 February 2008, no.5746
Effective date	1 March 2020

20. Ukraine

<p>Status</p>	<ul style="list-style-type: none"> ▶ In 2021, Ukraine has amended its tax law, introducing VAT on qualifying electronic services supplied by non-established foreign vendors to the Ukrainian private individuals (Law of Ukraine No. 1525-IX of 03.06.2021). ▶ If a non-resident service provider reached the registration threshold in the relevant calendar year, it would have to register for VAT before 31 March of the following year, start charging VAT to Ukrainian private customers after the date of registration, as well as submit quarterly VAT returns to UA tax authorities. ▶ Notwithstanding full-scale Russian invasion, practical application of new VAT rules began in 2022, with many major foreign service providers having registered for VAT at that time. ▶ Ukrainian tax authorities maintain a special online portal solution, enabling non-resident providers of VAT-able electronic services to register for VAT, submit VAT returns, communicate with the tax authorities, as well as to review VAT guidance and clarifications from the authorities. Yet, enforcement practice of the new VAT rules (including court practice) remains somewhat limited in many aspects.
<p>Scope</p>	<ul style="list-style-type: none"> ▶ Under Ukraine's tax law, where a non-resident service provider supplies electronic services to Ukrainian private customers (including individual entrepreneurs who are not registered for VAT), such services would be subject to VAT in Ukraine. ▶ The person liable for VAT would be the non-resident service provider (who does not operate through the PE in Ukraine) supplying services to UA private customers. At the same time, a non-resident does not fall under the definition of the VAT payer (i.e., DST VAT rules do not apply), where such non-resident: <ul style="list-style-type: none"> ▶ Supplies electronic services under intermediary agreements, if the invoices provided to customers define a list of electronic services and their actual provider; ▶ Only processes payments for electronic services, but does not actually participate in the provision of electronic services; ▶ Supplies electronic services directly through its permanent establishment in Ukraine (in this case, general VAT rules apply). ▶ Transaction qualifying as VAT-able electronic services include the following (list is non-exhaustive): <ul style="list-style-type: none"> ▶ Supply of electronic copies, granting access to images, texts and information; ▶ Providing access to databases; ▶ Supply of electronic copies and/or provision of access to audiovisual works, video and audio on demand, games, including supply of services on participation in such games, supply of services for access to TV programs (channels) or their packages, except for access to TV programs simultaneously with their broadcasting via the television network; ▶ Access granted to information, commercial, entertainment electronic resources and other similar resources; ▶ Supply of distance learning services via the Internet, which do not require human participation (with certain exceptions); ▶ Supply of cloud services where it relates to provision of computing, storage resources or electronic communications systems using cloud computing technologies; ▶ Supply of software and updates to it, including electronic copies, provision of access to them, as well as remote maintenance of software and electronic equipment; ▶ Provision of advertising services on the Internet, mobile apps and other electronic resources, providing advertising space. ▶ For VAT purposes, electronic services are deemed supplied where the service recipient is located. Where such services are supplied to an individual entrepreneur, the place of supply would be where such entrepreneur is registered as a business (i.e., Ukraine).
<p>Rate</p>	<p>20% (VAT)</p>

20. Ukraine (contd.)

Thresholds	A non-resident is obliged to register as a VAT payer if its annual volume of VAT-able supplies of electronic services to Ukrainian private individuals has exceeded UAH 1 million.		
Exclusions	<p>The following transactions are not considered to be electronic services (the list is exhaustive):</p> <ul style="list-style-type: none">▶ Supply of services ordered via the Internet, where their actual provision is carried out without the use of the Internet (services for the placement, rent of cars, services of food outlets for the supply of products, etc.)▶ Supply of goods and/or services that do not qualify as "electronic", but embed electronic services if the cost of the latter is included in the total cost of such goods or services▶ Supply of distance learning services via the Internet, if the Internet is used exclusively as a means of communication between the teacher and the listener▶ Supply of copies of works in the field of science, technology, art on material media▶ Supply of consulting services via email▶ Supply of internet access services		
Effective date	1 January 2022 (deadline for VAT registration of non-residents who reached the threshold in 2021, was 31 March 2022).

21. United Kingdom

Status	<ul style="list-style-type: none">▶ On 15 February 2023, a joint statement was issued between the United States and Austria, France, Spain, Italy and the United Kingdom, which agreed to extend the suspension of digital services taxes until 30 June 2024 (when it is hoped that the Pillar One MLC will be signed).▶ On 12 March 2024, the US also agreed with Turkey to suspend its digital services tax until the same date. The US Treasury Department published a new joint statement announcing the extension of the compromise agreement to include Turkey.▶ On 18 December 2023, the G20/OECD Inclusive Framework on Base Erosion and Profit Shifting (the “Inclusive Framework”) issued a statement calling for a finalization of the text of the Pillar One multilateral convention (MLC) by the end of March 2024 with a view to holding a signing ceremony by the end of June 2024.▶ On 22 July 2020, the UK’s Digital Services Tax was enacted as part of the Finance Act 2020 Its effective as from 1 April 2020. Subsequently, on 10 August 2020, the tax authority (HMRC) updated the Digital Services Tax Manual and added a list of countries that have taxes that are considered to be similar to the UK DST for the purposes of cross-border relief▶ On 21 October 2021, a Joint Statement from Austria, France, Italy, Spain, the UK and the US was released describing a compromise reached by the countries on a transitional approach to the treatment of existing digital services taxes (DSTs) and other relevant similar measures during the interim period before new OECD Pillar One rules come into effect.▶ Under the compromise, the five European countries, which are not required to withdraw their existing DST regimes until Pillar One takes effect, have agreed to allow a portion of taxes accrued by a multinational enterprise (MNE) under their DSTs or any other unilateral measures before Pillar One takes effect to be credited against the MNE’s future Pillar One Amount A tax liability when Pillar One rules are in effect. The US has agreed to terminate its proposed trade actions against the five countries with respect to their existing DSTs and commits not to impose further trade actions with respect to such countries and their DSTs during this interim period. Finally, the six countries are to remain in close contact to ensure there is a common understanding of the agreement and to endeavor to resolve any differences of view.
Scope	<ul style="list-style-type: none">▶ The UK DST applies from 1 April 2020 and is payable annually, nine months after relevant accounting period The legislation was is included in Finance Act 2020, which received Royal Assent on 22 July 2020.▶ The UK tax authority published its DST manual on 19 March 2020, which explains the structure and details of the UK DST. This manual includes: what is meant by digital services activity and revenue, definitions of a user and identifying revenue of UK users, detail on the role and responsibilities of the responsible member, as well as further details of the administration and compliance framework that applies for DST. There have been updates to the manual since its publication, including the definition of online services, the compliance framework and the list of countries that have taxes that are considered to be similar to the UK DST for the purposes of cross-border relief.▶ In March 2021, HMRC made further changes to the DST manual, introducing a section on the compliance framework, updating the guidance on submitting returns for groups with non-GBP consolidated accounts and adding Spain to its list of countries with similar DST (for which cross-border relief would be allowed). Further, from 14 June 2022, the Malaysian Service Tax on Digital Services by Foreign Service Providers is no longer considered by HMRC to be similar to the UK DST for the purposes of cross-border relief. Any claims for cross-border tax relief made before 14 June 2022 will be honoured, but no new claims for relief relating to this tax will be accepted .
Rate	2% of gross revenues from UK in-scope activities above threshold; however, taxpayers may apply an alternative calculation method calculated based on operating margin in respect of in-scope activities where they are loss- making or have a very low profit margin

21. United Kingdom (contd.)

Thresholds	<ul style="list-style-type: none"> ▶ £500m revenues from in-scope activities provided globally and £25m of revenue from in-scope activities provided to UK users per 12-month accounting period. The first £25m of revenues is not subject to the tax. £500m and £25m thresholds are applied to total revenues arising to a group from in-scope activities, rather than on an activity by activity basis. ▶ The group upon which the thresholds are tested is determined by reference to accounting consolidation principles. 				
Exclusions	Provision of an online marketplace by a financial services provider where upwards of 50% of revenues relate to the creation/trading of financial assets				
Effective date	1 April 2020

22. United States

22.1. United States - Federal

Status	<ul style="list-style-type: none"> ▶ On 15 February 2023, a joint statement was issued between the United States and Austria, France, Spain, Italy and the United Kingdom, which agreed to extend the suspension of digital services taxes until 30 June 2024 (when it is hoped that the Pillar One MLC will be signed). ▶ On 12 March 2024, the US also agreed with Turkey to suspend its digital services tax until the same date. The US Treasury Department published a new joint statement announcing the extension of the compromise agreement to include Turkey. ▶ On 18 December 2023, the G20/OECD Inclusive Framework on Base Erosion and Profit Shifting (the "Inclusive Framework") issued a statement calling for a finalization of the text of the Pillar One multilateral convention (MLC) by the end of March 2024 with a view to holding a signing ceremony by the end of June 2024. ▶ The imposition of a national DST and other federal taxes on the digital economy continue to be met with opposition from a divided US Congress. For the OECD's multilateral convention (MLC) to take effect in the US, two-thirds of the US Senate would need to ratify it, and Congressional Republicans remain opposed to the agreement. However, the Biden Administration continues to push for adoption of the Two-Pillar solution. On 19 July 2023, the Deputy Assistant Secretary for International Tax Affairs in the US Department of the Treasury testified before Congress in support of BEPS 2.0. Deputy Assistant Secretary Plowgian stated that "[i]t goes without saying that Pillar One and Pillar Two can only be implemented in the US with the support of Congress. We hope to have a complete Pillar One package soon and intend to continue to seek input."

22. United States

22.2. United States - Maryland

<p>Status</p>	<ul style="list-style-type: none"> ▶ Effective 1 January 2022, a new tax applies to the provision of “digital advertising services” in Maryland. ▶ The tax is the subject of two legal challenges: one in federal court and one in state court. The federal suit was largely dismissed on 4 March 2022 on grounds that it was barred by the federal Tax Injunction Act (28 U.S.C. § 1341). On 17 October 2022, the Circuit Court for Anne Arundel County (Maryland) ruled that the tax was unconstitutional and illegal under federal law. However, on 9 May 2023, the Maryland Supreme Court ruled that the taxpayers had failed to exhaust their administrative remedies before bringing suit in the state courts and dismissed the case. The taxpayers are expected to refile their challenge in the state’s Tax Court (an administrative agency). ▶ At least five states – Connecticut, Massachusetts, Montana, New York and Texas – have introduced or considered similar or identical measures and are likely awaiting the outcome of the Maryland challenge before seeking to advance legislation. New Mexico, on 9 August 2022, issued proposed regulations explaining that the state’s gross receipts (sales) tax applies to providers of digital advertising services whose digital platform may be accessed or viewed from within New Mexico. Notably, the proposed regulations specifically stated that the tax levied on those advertising receipts “does not impose an unconstitutional burden on interstate commerce.” Revised regulations that address sourcing methodologies are expected to be released in late-2023, but the New Mexico Taxation and Revenue Department maintains that the services are, and have always been, taxable. ▶ Effective 14 March 2021, Maryland’s sales and use tax applies to electronically delivered software and software-as-a-service (SaaS) transactions. Notable exceptions include any software or SaaS products that require customization (i.e., do not work as intended “out-of-the-box”) or software/SaaS products used for commercial purposes in an enterprise environment. The latter exception was enacted by the Maryland legislature, to be effective 1 July 2022; however the Maryland Comptroller has indicated that the exception has retroactive effect to 14 March 2021.
<p>Scope</p>	<ul style="list-style-type: none"> ▶ The tax applies to revenue derived from digital advertising services in Maryland, as determined by where the services are consumed (based on the location of the device used to view the digital advertising).. Revenue is apportioned using a worldwide, device-based factor, the numerator of isthe number of devices that accessed the digital advertising ▶ Services from a location in Maryland, and the denominator of which is the number of devices that accessed the digital advertising services from any location ▶ Device location is determined by the taxpayer using the totality of the data within their possession or control, including both technical information (e.g., IP address information; geolocation; cookies, etc.) and the terms of the underlying contract for digital advertising services. ▶ “Digital advertising services” are defined as “advertisement services on a digital interface, including advertisements in the form of banner advertising, search engine advertising, interstitial advertising and other comparable advertising services.” ▶ “Annual gross revenues” are defined as income or revenue from all sources, before any expenses or taxes, computed according to generally accepted accounting principles. Persons with annual gross revenues derived from digital advertising services within Maryland of at least USD1 million must file a return with the Office of the Maryland Comptroller of Treasury on or before 15 April of the next year. ▶ Persons that reasonably expected their annual gross revenues derived from digital advertising services in the state to exceed that amount must file a declaration of estimated tax on or before 15 April of that year and pay quarterly estimated taxes. ▶ Persons subject to the tax must maintain records of the digital advertising services they provided in the state to substantiate the basis for their apportionment and calculation of the tax owed on digital advertising gross revenues. ▶ Failure to comply with provisions of this new tax will result in criminal penalties, including fines and imprisonment.
<p>Rate</p>	<p>A progressive tax rate schedule applies, ranging from 2.5% of the annual gross revenues derived from digital advertising services in Maryland (i.e., the assessable base) for persons with annual gross revenue of USD100 million through USD1 billion, and to 10% of the assessable base for persons with global annual gross revenues exceeding USD15 billion.</p>

22. United States

22.3. United States - Georgia

Status	SB 56 (signed on 2 May 2023)	
Scope	New law imposes sales and use tax on the retail purchase or retail sale of specified digital products, other digital goods, and digital codes to an end user in Georgia, if such end user receives or will receive the right to permanently use such products, goods or codes and that the transaction is not conditioned upon continued payment by the end user. Tax applies regardless of whether possession of such items is maintained by the seller or a third party. Further, such sales will be considered a sale for resale if the item is subsequently sold, licensed, leased, broadcast, transmitted or distributed, in whole or in part, as an integral, inseparable component part of a service or another such product, good or code by the purchaser of the product, good or code to an ultimate consumer. Taxable products include the following: digital audio-visual works, digital audio works, digital books; electronically transferred artwork, photographs, periodicals, newspapers, magazines, video or audio greeting cards, or video games or electronic entertainment.	
Rate	Between 4% and 9%, depending on local jurisdiction

22. United States

22.4. United States - Puerto Rico

Status	The Governor of Puerto Rico signed Act 52 into law on 30 June 2022 (Act 52-2022). Among other changes, Act 52-2022 amends various provisions of the Puerto Rico Internal Revenue Code (PR Code) to incorporate the term digital products as a taxable item, and to establish the sourcing rules for the sale of digital products.	
Scope	Act 52-2022 also defines market facilitator, market seller, digital products, specific digital products and other digital products. Additionally, Act 52-2022 amends the SUT provisions to eliminate the requirement for taxpayers to pay the sales tax on a bimonthly basis. Act 52-2022 establishes that the last month to comply with the requirement to pay the sales tax on a bimonthly basis was June 2022.

23. Vietnam

Status	The Ministry of Finance in Vietnam released Circular 80/2021/TT-BTC on 8 October 2021 regarding the implementation of the country's tax law, including a section on digital tax.
Scope	<p>The rules apply in cases where an overseas business that does not have a Permanent Establishment (PE) in Vietnam carries out the following activities to organizations, or individuals in Vietnam:</p> <ul style="list-style-type: none"> ▶ E-commerce ▶ Digital platform-based businesses ▶ Other related services. ▶ The overseas supplier can directly register for tax filings or authorize a Vietnamese party to do so on its behalf. The authorized party is defined to include an organization or a tax agent operating under the laws of Vietnam. ▶ The Circular states that tax payable is calculated on revenue earned by the overseas supplier and different VAT/CIT rates will be applied depending on nature of the activities conducted. Three sources of information are to be used to determine and identify transactions of overseas supplier arising in Vietnam and it is the responsibility of the supplier to retain all related information used for determining Vietnam-sourced income in accordance with the Law on Tax Administration in the event of a future tax audit by the Vietnamese tax authority. ▶ We note that if the overseas supplier comes from a country which has a tax treaty with Vietnam, it may be possible to submit a tax treaty claim for corporate income tax exemption if it can demonstrate it does not operate through a PE in Vietnam. ▶ The Circular also addresses the responsibilities of Vietnamese parties (including Vietnamese counterparties under B2B supplies, and commercial banks/payment-service providers under B2C supplies) in withholding, declaring and paying taxes on behalf of overseas suppliers should the overseas suppliers fail to do so. ▶ The Circular has a tax registration and declaration requirement that is imposed with an effect from 1 Jan 2022. The online portal of the Tax Authority went live from 21 Mar 2022 and the overseas suppliers have been successfully declaring tax per the portal.

Status	<ul style="list-style-type: none"> ▶ With effect from 1 January 2020, the supply of radio and television services from outside Zimbabwe to an address in Zimbabwe or of an electronic service by an electronic commerce operator domiciled outside Zimbabwe to a person resident in Zimbabwe shall be deemed to be a supply made in Zimbabwe for VAT purposes, chargeable at the standard rate of 15% from 01 January 2023. Prior to 01 January 2023 the rate was 14,5%The obligation to charge and account for tax shall be that of the supplier or their duly appointed representative in Zimbabwe. Operators are required to appoint a representative taxpayer who will be responsible for accounting for the tax. ▶ With effect from 1 January 2019, Every person who provides services as a satellite broadcasting service or provides or delivers goods and services as an electronic commerce operator which receives revenues in excess of five hundred thousand United States dollars (US\$500 000,00) in any year of assessment from the provision or delivery of such services or services to persons resident in Zimbabwe, shall pay tax on such revenues charged and levied at the rate of 5%. ▶ The services are considered to be from a source in Zimbabwe for Income tax purposes, therefore taxable in Zimbabwe. The tax is paid as follows: 25 March for income earned December, January and February, 25 June for income earned in March, April and May; 25 September for income earned in June, July and August and 20 December for income earned in September, October and November. Electronic commerce operator is defined as an operator selling, providing or delivering services from outside Zimbabwe by the use of a telecommunications network or electronic means to customers or users in Zimbabwe. Representative taxpayer should be appointed. The provision does not apply to a foreign company with PE presence. ▶ For goods and services deemed to be supplied from a source within Zimbabwe the supplier, through an appointed representative taxpayer, is responsible for accounting for both VAT and Income Tax. In cases of imported services not covered by the deeming provision, the customer is responsible for accounting for VAT (income tax does not apply). Registration can be done online. In cases of manual registration, five working days may be adequate
